The Finest Professional Car Care Products Made

"Try It Once.. Use It Forever!"

Gliptone Manufacturing Inc. established in 1947, is a trusted chemical manufacturer with over 600 active formulations targeting the automotive and transportation industry. Since its inception, Gliptone has been a trailblazer of the revolution in car care products across the world cleaning and protecting interior and exterior surfaces with best in class products and processes that has been our expertise for over 75 years. It has stood the test of time as the world leader in manufacturing premium quality products. From concept to development, to production, Gliptone Products have delivered the very best industry performance using high quality ingredients at a relatively low cost.

Gliptone products have been built to protect cars, bikes, trucks, buses, boats and locomotives from some of the harshest existing elements and weather conditions on the planet including scorching hot summer sun to snow filled freezing winters. From city pollution and industry generated airborne pollutants to the sand & salt filled forceful winds. Gliptone's offering includes a full line of Professional Automotive Reconditioning Products, Marine/RV Products, World Class Leather Care Products, High Tech Polymer Sealants and Polysilazane Coatings & Gliptone's Professional Car Wash Tunnel Chemicals.

HEADLIGHT RESTORATION

process does not require you to sand away valuable layers of your headlight lens, which can compromise the integrity of the polycarbonate surface. Adds considerable strength, clarity and UV protection restores your lens to 'brand new' appearance

PROCEDURE

Take small quantity of Step-1 onto the scrub provided in the kit, apply the same onto the headlight. After step 1 application, clean the headlight with the cleaning agent. Next, Spray Step-2 protective coating from bottom to top on the Headlight Lens with swift motion. Let it dry

BENEFITS

Quickly & Easily removes oxidation from headlights without sanding away layers of headlight lens. Restore the clarity and vision by priming the lens with additional UV coating with an warranty up to 1 year.

WHY GLIPTONE

The chemistry contained in this Gliptone Headlight Restoration Kit is the most innovative in the automotive industry and the GLIPTONE process is without question the MOST EFFICIENT! In most other competitive processes you are required to sand through as much as 25% of the lens surface leaving it more susceptible to future damage from stone chips and UV degradation. The GLIPTONE process starts by chemically removing the outermost discoloured and damaged surface while conditioning and priming the surface. Once cleaned and primed the lens receives multiple coats of Gliptone's crystal clear, super hard poly coating that adds considerable strength, clarity and UV protection. In many cases the GLIPTONE restoration process will restore a lens to a 'better than new' appearance that will last the lifetime of the car; however the extent of surface damage can range considerably from lens to lens and in some cases a lens can have damage that is on the inside where the technician cannot reach.

1 Simple Two Step Process

2 No Tools, No Sanding

3 Easily Restores Clarity

ANTI-STATIC ENGINE SHINE

ULTRA CLEANER is a special multi purpose cleaner/degreaser for most interior and exterior applications. Extremely effective in dissolving tough dirt and stains. Non caustic and Meets EPA Standards.

HYPER SHINE is a highly dilute-able water based dressing that can be diluted as much 4:1. it works great on exteriors, interiors & engine compartments. It has a luscious, fresh grape scent. Extremely economical & versatile. Use on Rubber, Vinyl & Plastic surfaces.

PROCEDURE

Mix Ultra Cleaner to 1:4 ratio, Spray the mixture in the engine bay compartment then gently scrub the area with help of an brush. Wipe the area with a Microfiber cloth. Mix Hyper Shine to 1:4 ratio and spray the mixture onto the surface and let it dry.

BENEFITS

Degreases and Cleans the Engine Bay area and gives an matte finish natural look which protects the engine bay area from dust and contaminants.

WHY GLIPTONE?

The Gloss PU coating – makes the engine look good.. FOR A WEEK ONLY! After a week when the engine starts heating and the temperature rises, the contraction and expansion of the glue & the solvents start to break and this makes the engine look ugly! Because its alcohol based it also can catch fire! Oils, greases, dirt etc get sealed with the coating and it weakens the rubber, wiring and plastics even after spraying on the colder engines, it seizes water in the electrical components causing damage. Gliptone Anti – Static Engine Service is an innovative service that degreases, cleans and shines the engine compartment in two simple steps. The Antistatic property of the Hyper Shine allows us to clean and maintain the engine compartment “new like” without the use of water. Just using high pressure air gets rid of the dirt. Also the dirt does not stick to the component due to this. Unlike like Engine Lacquer Coating this is not a coating, and hence won't peel off or crack over period of time.

- 1 No Cracking
- 2 No Peeling
- 3 No Damage To Engine Components

TRIM RESTORATION

GLIPSCRUB is a multipurpose cleaning sponge made from an innovative cleaning material MELAMINE.

ULTRA CLEANER is a special multi purpose cleaner/degreaser for most interior and exterior applications. Extremely effective in dissolving tough dirt and stains. Non caustic & meets EPA standards *approved by central drugs standard control organization, government of india.

TRIM & TIRE JELLY is a thick easy-to-apply gel allows for maximum control during application. Will not run or drip. It spreads easily and stays where you put it.

PROCEDURE

Mix Ultra Cleaner up to 1:4 ratio spray it onto the trims and spray little onto the glipscrub then gently scrub the area. Wipe it with a Microfiber cloth & then apply Trim & Tire Jelly onto the cleaned areas with the help of an applicator.

BENEFITS

Restores faded Trims to make it look like new with glossy wet shine. Effectively removes all residue from the Trims and gives protection.

WHY GLIPTONE?

Conventional polishes make the trims look shiny however, within few days of the treatment, they easily attract dust and dirt, making it look faded and grainy again. Gliptone Trim Restoration Service provides the greatest protection and gloss of any tire & trim dressing. Effectively removes all residue from the Trims and gives protection, Restores faded Trims to make it look like new with glossy wet shine. Thick, easy-to-apply gel allows for maximum control during application. Will not run or drip. It spreads easily and stays where you put it. Ideal for tires, especially low profile performance tires, because it will not "sling" dressing onto body panels when tires are in motion. Protection and gloss lasts 5 times longer than conventional dressings.

1 Easy to Apply

2 Protection Lasts 5 Times

3 Restores Faded to New

RUBBER CARE

ENGINE WASH is a water-base multi purpose cleaner/degreaser. Cuts heavy grease and soil on engines, tires and shop floor.

TRUE BLUE TIRE SHINE is a premium Professional quality exterior dressing for tires, mouldings, bumpers and vinyl trim. Unsurpassed shine and durability by any product on the retail market today! Penetrates surface to produce a long lasting and water repellent shine. Beads water off your tires as if they were waxed!

PROCEDURE

Mix Engine wash up to 1:6 ratio spray it onto the tires. Then use a brush to scrub away all dirt, oil & other residues. Now apply True Blue onto the cleaned area with the help of an applicator.

BENEFITS

Degreases the tires of any oil, greases & road film. With ultimate shiny finish with protectants and water beading too. NON – GREASY FORMULA.

WHY GLIPTONE?

A special treatment that removes grease, wax, build-up, polymers, tar and any previously applied dressing to leave your tires looking like new. Maintains, cleans and beautifies door, window and trunk seals and tires. Prevents freezing-up in winter. Keeps rubber parts elastic and extends the service life. Also ideally suited for maintaining and deep-cleaning car tires and rubber mats.

- 1 Non- Greasy Formula
- 2 Ultimate Shiny Finish
- 3 Beads Water Off

ALLOY WHEEL TREATMENT

GLIPTONE GT IRON EATER is a fast acting, pH Neutral gel formula that clings to surfaces providing added dwell time and exceptional cleaning action. The pH neutral formulation makes this product a much safer alternative than acid-based wheel cleaners and surface contaminant removal.

RED COLOUR SIGNAL when in contact with iron contaminants. The colour indicator is an added touch that helps visualize the cleaning action. Safe on Glass, Paint, and Rims, including Aluminium and Chrome.

WHY GLIPTONE?

This treatment is designed for cleaning and protection of the alloy wheels. One of the biggest challenges being faced is in protecting alloy wheels from brake dust and grime. This, in-turn leaves spider web cracks on the alloy wheels and cannot be repaired. The beauty and sheen of the alloy wheels is lost in the process. This application is aimed at restoring the lost sheen of the alloy wheels and also ensuring long-term protection.

WITH

INDICATOR

1 Non- Greasy Formula

2 Ultimate Shiny Finish

3 Beads Water Off

CHROME RESTORATION

LIQUID METAL POLISH recommended for polishing and maintaining hard metals like stainless steel, chrome, nickel or magnesium. It will also tackle medium range corrosion, oxidation, tar, rust, stains and tarnish from aluminium, brass, copper and bronze with the greatest of ease.

EFFECT

This polish contains no ammonia, acid or water. Consequently, this product applies and removes easier and goes twice as far as equal amounts of any other metal polishes. GLIPTONE Metal Polish seals and protects with penetrating oils and waxes for a long lasting brilliant shine.

PROCEDURE

Take small quantity of Liquid metal polish onto a microfiber cloth. Gently apply the product onto the desired area until the oxidation is completely removed. Later buff the area with another clean microfiber cloth for shiny finish.

BENEFITS

Cleans & Protects chrome without scratches unlike other products without ammonia or acid

- 1 No Ammonia or Acid
- 2 Seals & Protects with Oils
- 3 Provides Long Lasting Brilliant Shine

LEATHER CARE

GLIPTONE'S LEATHER CLEANER is specially formulated to restore the beauty and resilience of leather as it cleans without harmfully removing any natural oils. This product is ph balanced to preserve the strength and durability of old leather. Enhances original new leather scent.

GLIPTONE'S LIQUID LEATHER CONDITIONER is specially formulated to preserve the unique, natural qualities and beauty of fine leather. Breathes new life and resilience into neglected leather restoring life and lustre. Requires no vigorous rubbing.

GLIPSTIK - A revolutionary product removes pen, ink scuff marks, crayons, makeup and much more from leather, vinyl and even plastic surfaces. Works instantly and is completely safe on all leather surfaces. Will not damage leather surfaces. Rub Glipstik® on the stain and allow to emulsify the stain. Buff with Softouch® Microfiber Towel.

- 1 Restores Leather
- 2 Original Leather Scent
- 3 Easy-to-Use

INTERIOR VINYL TREATMENT

ULTRA CLEANER is a special multi purpose cleaner/degreaser for most interior and exterior applications. Extremely effective in dissolving tough dirt and stains. Non caustic and Meets EPA Standards. Ultra cleaner, an approved disinfection chemistry would clean the surface for dirt & as well as SARS Cov-2 bacteria with "natural look finish" unless like other products which give shiny finish that attracts dirt and reflects light.

EXPRESS INTERIOR DETAILER is a professional grade, non-greasy, 'spray-n-wipe' formula that provides light duty cleaning and conditioning to all automotive interior surfaces. Safe and effective on vinyl, plastic, rubber, wood grain and painted interior panels. Removes dirt, dust, fingerprints, cigarette film, body oils and pollutants while conditioning surface and leaving a 'Natural Look Finish'.

BENEFITS

Mix Ultra Cleaner to 1:6 ratio, spray the mixture onto the surface and clean it with a microfiber cloth. Wipe the area with clean microfiber cloth and spray Interior detailer and wipe again to remove dirt, grime, cigarette film, body oils, waxes and fingerprint marks.

WHY GLIPTONE?

This services makes the car look great and eliminates deep seated dirt, debris, grease, grime, residue, smudge and fingerprints. This long-lasting formula penetrates deep into interior and exterior plastic, vinyl, and rubber products to restore the color and shine they had when they were new.

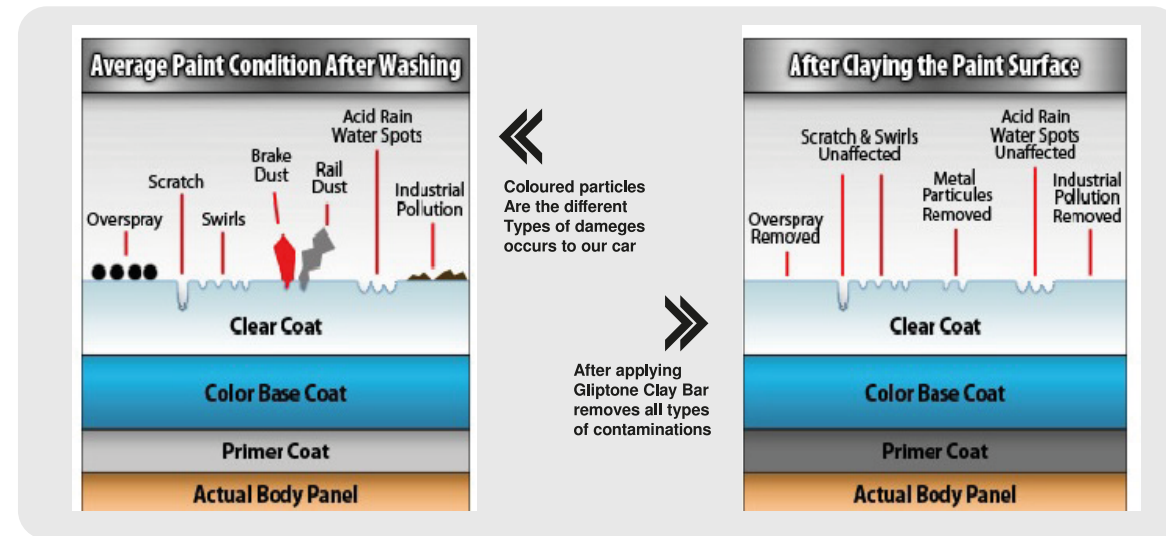

- 1 Safe & Effective
- 2 Nature Look Finish
- 3 Spray-n-wipe Formula

CLAY SERVICE

Gliptone clay bar is the safest and most effective way to remove contamination from your vehicle's paintwork. It easily removes overspray, brake dust, pollution and contamination for a smooth glass like feel. Gliptone clay bar works great on paintwork, glass, plastic and metal surfaces.

- 1 Ultimate Shiny Finish
- 2 Remove All Dust & Rust
- 3 Shines Like New
